

Ross Carhart

Senior Data Strategist and Analytics Engineer

Pittsburgh, PA | rcarhart2@gmail.com | rosscarhart.com

PROFESSIONAL SUMMARY

Senior Data Strategist and Analytics Engineer with expertise in data modeling, business intelligence development, and ETL automation. Proven record of delivering multi-million dollar cost savings, optimizing data pipelines, and leading analytics teams to drive measurable business impact. Skilled at translating complex data into actionable insights across retail, media, and consumer industries using Power BI, Tableau, SQL, Python, and dbt.

EXPERIENCE

Senior Data Strategist

Abercrombie & Fitch, Remote | October 2024 - Present

- Architected a comprehensive customer data model enabling marketing, decision sciences, and product teams to build KPIs, analyze campaigns, and optimize audience targeting.
- Trained and mentored analysts in SQL, BI tools, and data modeling, elevating team efficiency and data literacy.
- Design, develop, and maintain customer-facing and internal reporting solutions using Power BI and enterprise data platforms.
- Design, build, and maintain data pipelines to ingest, transform, and load data from source systems to implement staging, analytical, and semantic layer architectures.
- Build and manage curated datasets and semantic data models that support scalable reporting and self-service analytics.

Senior Analytics Engineer

Doner Media, Remote | April 2023 - October 2024

- Implemented a dbt project to streamline data transformation processes, increasing scalability and governance.
- Automated marketing campaign data extraction using open-source platforms, reducing data acquisition costs.
- Delivered client-facing Tableau and Power BI dashboards for UPS, McDonald's, CableOne, and Owens Corning, improving business insights and client satisfaction.
- Optimized pipelines through code refactoring, reducing runtimes by 30 percent.

Senior Data Analyst

GNC, Pittsburgh, PA | September 2021 - April 2023

- Grew subscription business 200 percent by designing new KPIs to better market and measure subscription customers.
- Automated reporting in Tableau and Power BI, eliminating repetitive ad-hoc requests and saving analyst time.
- Built automated discontinued-product tracking to deplete inventory and reduce out-of-stock notices.
- Detected and fixed bugs in inventory algorithms and marketing campaigns, improving fulfillment by 10 percent and reducing customer spam.
- Designed A/B tests to measure marketing effectiveness and developed pipelines to monitor competitors' social, SEO, and retail data.
- Managed and mentored analysts and interns.

Data Analyst

TruFoodMfg, Pittsburgh, PA | November 2017 - September 2021

- Created BI dashboards for executives and plant managers, enabling data-driven decision-making in factory operations.
- Developed and tracked KPIs that reduced downtime by 25 percent and lowered operating costs by 10 percent.
- Managed Tableau Server and ensured robust reporting through rigorous data quality processes.
- Established a Quality Metric for a corporate bonus program, incentivizing employees to prioritize quality.
